

How to get ePubs into iTunes

Create your eBook using Pages or Word. It is very important that any video or images are placed there IN LINE so they don't get muddled with the text when they go on the iPad.

On an Apple place & select the image and sure it is IN LINE. To do that click select the image or movie. Then click on the IINSPECTOR. Select the Object placement icon and click INLINE (moves with text).

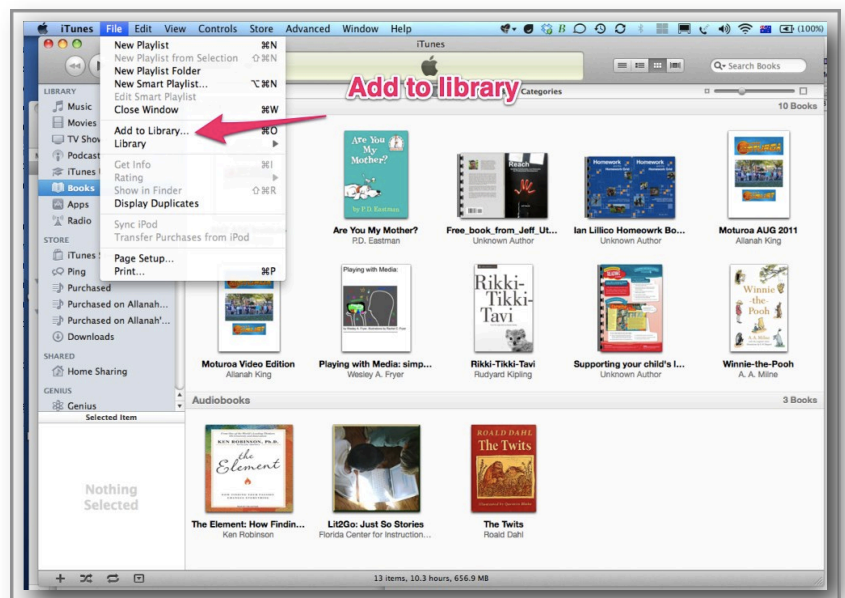

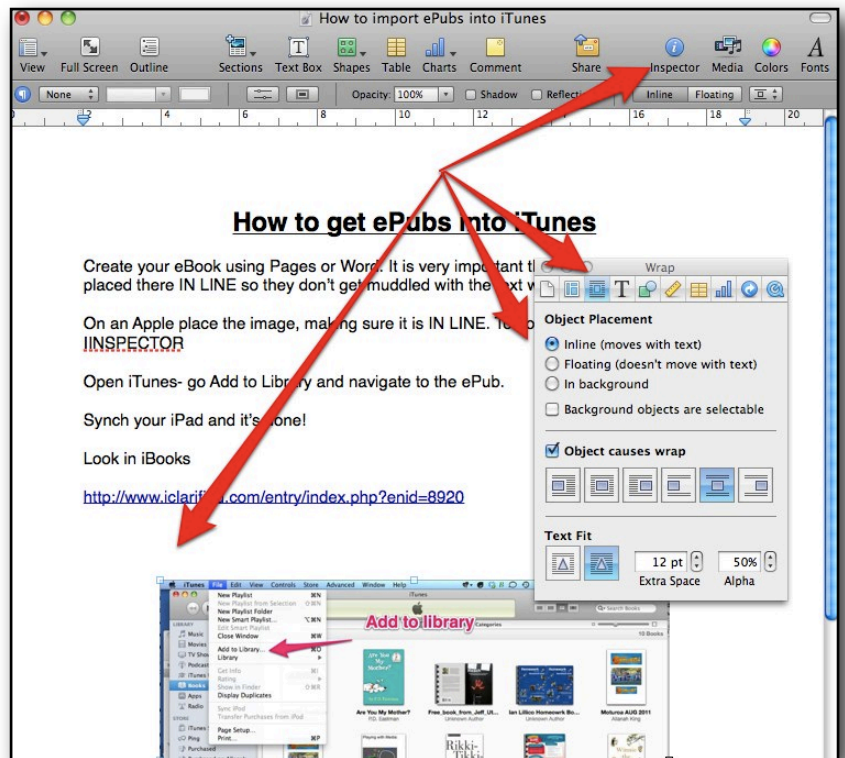

Do that for all of the objects you place.

Now go FILE- EXPORT and export it as an ePub.

Put it on the desktop where you can find it.

Open iTunes- go Add to Library and navigate to the ePub.

Sync your iPad and it's done!
