

Sharing our vision

Development of pedagogy for next year with a view to looking back at Level 1 and the new alignment to Level 2.

We would like HODs to have guided their department through a discussion of our e-learning next year. We would like our students to experience e-learning in most units of work. These experiences should carry learning to the higher orders of Bloom's Taxonomy. We would like teachers to focus on "Creating Content" "Sharing Content", "Collaborating and "Social Learning". Two of these units of work in each subject in each year level will be audited at the end of the year. This may take the form of each HOD presenting their best unit of work at an HOD meeting.

Enhancing existing e-learning and new e-learning pedagogy

- **Creating Content** : Podcasts, Blogs, E-folios, blogs, Videos, Wikis, Moodle 'books', Jing etc
- **Sharing content**: Portfolios, Blogs, Forums, Performances, Film and Media viewings, Skype, Conferencing on student work, Webinar (seminars on the web)
- **Collaborating**: Google docs and Google sites, Moodle, Wikis, Video Conferencing
- **Social learning**: Facebook, Skype, Forums, Virtual Learning Network (VLN)

Trend towards: decentralising learning, independent learning, creating a collective voice, sharing with parents, sharing with students in other schools, sharing with the community.

We are trending towards using Moodle as a portal: Cloud computing

Smart Tips:

Longer homework times to support access to appropriate hardware.

Task design that does not need 32 computers at one time

Rotating Unit plans to improve access to laptops.

Remember – you may choose which Learning Management System you use whether it be Google or Moodle

(Level 1,2 and 3 Course Outlines loaded and a paper copy to Jeanette by the end of Tuesday)

Choosing and Creating
